

This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

### Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

- + *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.
- + *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.
- + *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.
- + *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

### About Google Book Search

Google's mission is to organize the world's information and to make it universally accessible and useful. Google Book Search helps readers discover the world's books while helping authors and publishers reach new audiences. You can search through the full text of this book on the web at <http://books.google.com/>

## ANNUAL REPORT,

AND

## LISTS OF ACCESSIONS.

April 1882 to March 1883.

CALCUTTA :  
PRINTED BY ORDER OF THE TRUSTEES  
S<sup>m</sup> 1883.

REPORT  
OF THE  
TRUSTEES OF THE INDIAN MUSEUM  
For the year 1882-83.

THE following report on the administration of the Indian Museum Trust, during the year ending on the 31st March 1883, is submitted for the information of His Excellency the Right Honourable the Governor General in Council :—

MEMBERS.

At the commencement of the year the Board of Trustees consisted of the following Members :—

1. President of the Asiatic Society of Bengal—**SIR ASHLEY EDEN, K.C.S.I.**
2. Secretary in the Home Office—**A. MACKENZIE, Esq.**
3. Officiating Accountant General of Bengal—**A. P. MACDONNELL, Esq.**
4. Superintendent of the Geological Survey of India—**H. B. MEDLICOTT, Esq., F.R.S.**
5. **RAJAH RAJENDRA MULLICK, RAI BAHADOUR . . . . .**
6. **HON. MAHARAJA J. M. TAGORE.**
7. **A. O. HUME, Esq., C.B.**
8. **MAJOR-GENERAL A. CUNNINGHAM, C.S.I., C.I.E., R.E. . . . .**
9. **MAJOR-GENERAL J. T. WALKER, C.B., R.E., F.R.S., . . . . .**

} Nominated by the Governor General in Council.

16. THE HON. H. J. REYNOLDS . . . . .	

### *Changes in the Board during the year.*

The Hon. Mr. Reynolds became an *ex-officio* member as President of the Asiatic Society of Bengal in the room of Sir Ashley Eden. Mr. F. J. Fergusson was elected in May 1882 in Mr. F. Reynolds' place. Mr. Fergusson resigned the Trusteeship in January 1883 on his departure from India, and the Hon. Colonel S. T. Trevor, R.E., was elected in his place. The Accountant General's office was held by the following officers, who took up the post of Honorary Treasurer :—

- Mr. A. P. MacDonnell, to April 1882.
- Mr. J. A. Cook, to 9th May 1882.
- Mr. S. Jacob, to June 1882.
- Mr. E. Atkinson, to July 1882.
- Mr. J. A. Cook, to 22nd August 1882.
- Mr. S. Jacob, to 6th December 1882.
- Mr. A. C. Tupp, for the rest of the year.

Major Waterhouse officiated as Honorary Secretary during Mr. Medlicott's absence on leave, from 21st July to 4th November.

By order of Government, the Trusteeship was transferred from the Secretary in the Home Department to the Secretary in the Revenue and Agricultural Department in Febru-

## INDIAN MUSEUM.

ary 1883, in consequence of which Mr. E. C. Buck succeeded Mr. A. Mackenzie.

By these changes the constitution of the Board on the 31st March 1883 had become as follows :—

1. President of the Asiatic Society of Bengal—**THE HON. H. J. REYNOLDS.**
2. Secretary in the Revenue and Agricultural Department—**E. C. BUCK, Esq.**
3. Accountant General, Bengal—**A. C. TUPP, Esq.**
4. Superintendent of the Geological Survey of India—**H. B. MEDLICOTT, Esq., F.R.S.**
5. **RAJAH RAJENDRA MULLICK, RAI BAHADOOR.**
6. **THE HON. MAHARAJA SIR J. M. TAGORE, K.C.S.I.**
7. **A. O. HUME, Esq., C.B.**
8. **MAJOR-GENERAL A. CUNNINGHAM, C.S.I., C.I.E., R.E.**
9. **MAJOR-GENERAL J. T. WALKER, C.B., R.E., F.R.S.**
10. **REV. DR. A. F. R. HOEHNLE .**
11. **J. ELIOT, Esq. . . . .**
12. **DR. H. W. McCANN . . .**
13. **MAJOR J. WATERHOUSE . .**
14. **H. F. BLANFORD, Esq., F.R.S. .**
15. **DR. RAJENDRA LALA MITRA, C.I.E., L.L.D.**
16. **THE HON. COL. S. T. TREVOR, R.E.**

Nominated by the Governor General in Council.

Nominated by the Asiatic Society of Bengal.

Elected by the Trustees.

Meetings have been held monthly on the usual days. The annual general meeting for the election of officers and committees, and for the consideration of the Annual Report, was held on the 8th May 1882.

REPORT OF THE TRUSTEES OF THE  
HONORARY OFFICERS.

LIEUTENANT-GENERAL J. T. WALKER, C.B., R.E., F.R.S., *Chairman.*  
THE HON. H. J. REYNOLDS, *Vice-Chairman.*  
H. B. MEDLICOTT, Esq., *Honorary Secretary.*

COMMITTEE.

At the annual meeting in May, a Finance and Visiting Committee was re-appointed, consisting of the following Members :—

DR. RAJENDRA LALA MITEA.  
H. F. BLANFORD, Esq.  
MAJOR J. WATERHOUSE.  
J. ELIOT, Esq.  
F. J. FERGUSSON, Esq.

The honorary officers are also *ex-officio* members of the Committee.

The Finance Committee has had eleven regular meetings, at which the accounts have been examined and the expenditure controlled.

GENERAL ADMINISTRATION.

For the greater part of the year the Museum was deprived of two-thirds of its scientific staff. Mr. Wood-Mason was obliged to take sick leave to Europe early in September, and Mr. Nevill did not return from sick leave till the middle of November. After a brief interval of fairly restored health he again broke down, and was obliged, under medical advice, to resign his appointment and leave India. Mr. Nevill was an enthusiastic Conchologist, and through his extensive correspondence with other workers he has made valuable additions to our shell collections. His departure is a great loss to this department of the Museum. The Trustees have applied

## INDIAN MUSEUM.

through Government for the appointment of a competent successor, an educated young naturalist with a sound training in biological studies, especially of the invertebrata. Apart from the conduct of the work in any particular branch, it is essential that the Museum officers should be recruited from men who are educated up to the modern standard of research.

Mr. Nevill's departure terminates, so far, a dual appointment which it is not considered desirable to renew. Besides being the assistant in charge of the shell collections, he also had charge of the Trustees' Office as Assistant Secretary. It is plain that, under many circumstances, it would be objectionable that a junior officer of the Museum should have confidential access to the records and proceedings of the governing body. Just at present the native head clerk and the Honorary Secretary, having had long experience in the office, can get along without difficulty, but a new Honorary Secretary might find himself in serious perplexity without a really competent assistant in charge of his office.

During the absence of Mr. Nevill, and subsequently of Mr. Wood-Mason, the Trustees were able to secure partially (on holidays and during spare hours) the services of Mr. L. de Nicéville. As an expert among the Lepidoptera, his services have been of much value in that delicate branch of the collections. The difficulty in this country of finding a qualified person ready to take charge during the temporary absence of the Museum officers is a frequent cause of anxiety, as involving much risk and the suspension of all real work on the collections. It is an independent and imperative reason for securing a thoroughly competent man as first Assistant in the room of Mr. Nevill.

Early in the year Dr. Anderson brought out the first part of his catalogue of the Mammalia, and before its close the first

## REPORT OF THE TRUSTEES OF THE

part of his catalogue of the Archæological collections was also published. These are both works of considerable labour, and afford the best evidence of the value of the collections and of the care bestowed upon them. The Trustees have great satisfaction in expressing their high appreciation of the manner in which Dr. Anderson performs the many responsible duties of his office.

With reference to an observation made in last year's report upon the want of an efficient connection between the Museum and the Archæological researches carried on in various parts of the country, the Trustees have much gratification in noticing the resolution issued by the Government of India with a view to establishing co-operation in these labours. It is hoped that a mistaken view of local interests may not interfere with a system which offers the best chance of a result in favour of antiquarian studies in India. There is still need for a definite order of Government requiring that all moveable objects described and figured in the reports of the Archæological Survey should be deposited with a clear reference label in the Indian Museum. Of many such objects figured in the volumes of these reports, no clue is given as to their place of deposit.

In this connection, thanks are due to Colonel Tennant, R.E., Master of the Mint at Calcutta, for the enlightened example he has set in offering to transfer to the Museum an official collection of coins, ancient and modern, now at the Mint,—an arrangement to which the consent of Government has been given. The coins will still be fully available for official reference, while for numismatists in general they will be greatly more accessible in their new place of deposit.

## INDIAN MUSEUM.

A reference was made in June by the Government of India, enquiring whether accommodation could be found in the Museum for certain economic products. Although such an object is within the scope of the Museum, as laid down in the Act, the primary engagement stipulated for at the time of the transfer of its collection by the Asiatic Society of Bengal was to provide for the due exhibition and preservation of the objects of Natural History and Archaeology. The present building being no more than sufficient for this purpose, and the sanctioned staff of officers being already below what would be required for the full development of our resources, the proposal in question could not be adopted, but Government was informed that the Trustees would be glad to favour an extension of the Museum in the required direction.

Formal application was again made to the Government of India for a railing and gates to enclose and protect the Museum, which is still unprovided with an external barrier of any kind. In reply, the Trustees were referred to the Government of Bengal, as under the 'Financial Contract' the cost of the work would fall on the Provincial Revenues. It is to be feared that aid from this quarter may not be available while so many public buildings are still in hand at Calcutta.

The question of placing some restriction upon the present indiscriminate admission to the Museum was again brought forward by the Superintendent in the interest of the more intelligent classes who would be most likely to derive some instruction from the collections. The majority of the Trustees were, however, still against the introduction of any entrance charge. By way of compromise it was decided that on two days of the week (Thursday and Friday) admission should be only by ticket, obtainable on application from the

## REPORT OF THE TRUSTEES OF THE

Superintendent or from a Trustee. It was also ruled that the men on guard in the galleries should be put into uniform as a distinctive mark of authority.

Circumstances have again arisen to defer the premises adjoining the building being taken up for the purposes of the Museum. The Bengal Secretariat vacated these premises towards the end of the year, and the Department of Works took in hand the alterations necessary to fit them for the use of the Museum as prescribed by the Trustees. Meanwhile, there arose a proposal for an International Exhibition of Arts and Manufactures to be held in Calcutta in the cold season of 1883-84. On the day of the monthly meeting of the Trustees in December, a verbal communication was made by the Bengal Secretary in the Public Works Department to the Honorary Secretary to the Trustees, requesting him to ascertain if the Trustees would consent to the Exhibition being held on the Museum premises and partly within the building. Among the inducements held out, the principal were a full length extension of the north galleries of the Museum and the roofing of the quadrangle with glass. On the prospect of such permanent advantage, as well as on general public grounds, the Trustees expressed their hearty desire to aid in promoting the success of the Exhibition. Upon this conditional consent, work was at once commenced to erect temporary buildings for the Exhibition on the south side of the Museum, and at their February meeting the Trustees were offered a choice of designs for a permanent gallery to be erected on the Chowinghee frontage detached from the Museum, and of which the immediate purpose was to serve as a facade to the temporary Exhibition buildings behind it. The construction of this gallery will not dispense with the necessity for increased accommodation on the north side of the Museum, as formerly proposed by the

## INDIAN MUSEUM.

Government, and the Trustees hope that it will eventually be found possible to carry out the required design in addition to the extension which has now been taken in hand. The roofing of the quadrangle was given up on both sides, by the Trustees as undesirable, and by the Department of Works as too difficult and costly.

As much material preparation had been made in view of the immediate occupation of the premises adjoining the Museum now taken up for the Exhibition, the Bengal Government has provided a house in a convenient position to which the working collections have been removed.

The details of work, &c., are given in the annual reports by the Superintendent.

The property of the Museum is in good preservation.

H. B. MEDLICOTT,

*Honorary Secretary.*

## REPORT OF THE SUPERINTENDENT

For the year 1882-83.

---

IN my report for last year, I recorded my return to duty, on the 13th of April, from my Expedition to the Mergui Archipelago.

The sorting out and distribution into groups of the collections formed on that Expedition occupied my attention for some time after my return, and as the Trustees sanctioned that the various groups should, as far as possible, be worked up by specialists in Europe, the superintendence of the arrangement and packing of the specimens for this purpose devolved upon me personally.

By the 8th of May, I finally completed the first part of the Catalogue of Mammalia, and submitted a published copy to the Trustees on that date.

After these two labours had been overtaken, the greater part of my time, throughout the remainder of the year, was occupied with the Descriptive Catalogue of the Archæological objects in the Museum, the first part of which was published on the 28th of March, and laid before the Trustees.

A portion of my time was also taken up in superintending the re-naming and numbering of the bird collection now in course of being cleaned and remounted.

I also examined and checked a large number of small antiquities and coins received from the Archæological Survey of India, and incorporated them in the collections of the Museum.

## REPORT OF THE SUPERINTENDENT,

I also selected a considerable series of Reptiles and Batrachia for exchange with Dr. J. H. Garnier of Ontario.

At the request of His Honour the Lieutenant-Governor of Bengal, I gave my advice and assistance in procuring specimens of boats, nets, &c., for the International Fisheries Exhibition, London, and prepared a catalogue of the exhibits, and the Museum has been benefited somewhat by this, as I have been permitted to retain certain duplicate specimens for the Trustees.

### DEPUTY SUPERINTENDENT.

Mr. J. Wood-Mason named and registered all the unnamed *Hesperidae*, and made some microscopic preparations of a few of the species to ascertain their affinities.

He also registered various invertebrate specimens as they were received, and commenced the exhibition of the Lepidoptera in the new cases. Unfortunately, this work was interrupted by Mr. Wood-Mason's health giving way and necessitating his departure for Europe on the 9th of September last.

### FIRST ASSISTANT.

Mr. Geoffrey Nevill returned from furlough on the 16th of November, and at once commenced to lay out the shells of the Mollusca for exhibition in the new cases provided for them. He determined a large collection of shells brought back by himself from Australia and other places, and he effected many important exchanges in his department.

Mr. Nevill's visit to Australia was not productive of that improvement in his health which, it was hoped, would result from it, and his health again broke down seriously in January,—so much so, that his work in the Museum practically ended about that time, and on medical advice he resolved to

## INDIAN MUSEUM.

resign his appointment and proceed to the south of Europe, which he did, leaving Calcutta on the 12th of March.

I desire to record the very high estimate I have formed of the character and extent of the scientific work performed by Mr. Nevill, under great physical debility, while he was an officer of the Trustees. He brought his department of the Museum *en rapport* with all the leading conchological authorities in the world, and by means of exchanges with them he formed for the Trustees a collection of shells, more especially of the Eastern hemisphere, which will compare favourably with the majority of collections to be found in the more important Museums.

During his tenure of office, he commenced the publication of a detailed Descriptive Catalogue of the Mollusca in the Museum, but unfortunately his health did not permit him to bring out more than one *Fasciculus*. He, however, was able to make more progress with the lighter work of a Hand-list, of which one volume has already been published; and I have undertaken, in his absence, to see a second part through the press, and of this a considerable portion is already printed, and I hope soon to be able to issue the work.

### EXTRA ASSISTANT.

Mr. de Nicéville was principally engaged with the Diurnal Lepidoptera, and after Mr. Wood-Mason's departure I requested him to proceed with the arrangement of the Lepidoptera in the cases in the public gallery, and to this work he has steadily given his attention. He has besides named and arranged a considerable number of Sphingidæ, and named, registered, arranged, and mounted many collections of Lepidoptera from Java, Sikkim, Mergui, Cachar and Orissa, and effected some important exchanges by which the

## REPORT OF THE SUPERINTENDENT,

Museum became possessed of a valuable series of European and Australian Lepidoptera.

### SECOND ASSISTANT.

Mr. Fraser returned from furlough on the 16th October, and since then has been engaged, at Kyd Street, mounting skeletons of birds, and in stuffing and making casts of fish. He has also commenced the stuffing of a gaur—*Bos gaurus*.

### TEMPORARY ASSISTANT.

Mr. Cockburn left the temporary service of the Museum on Mr. Fraser's return from furlough. During the time he was employed in the Museum he roughly identified and also registered the birds and fish collected in the Mergui Expedition, ticketed some of the birds given to Taxidermists to be cleaned, prepared a set of names for bird labels, and mounted some bird skeletons.

### MR. DREYER.

After the departure of Mr. Wood-Mason, I recommended to the Trustees, on the 21st of November, that Mr. Dreyer should act as a Temporary Assistant in the Museum, and he has done so since Mr. Wood-Mason's departure. He has been chiefly engaged in going over the alcoholic collection of Reptiles, re-arranging it and putting on new labels. This he has done in addition to his work as Registrar and Librarian, and Mr. Dreyer has given me complete satisfaction in the way he has performed these duties.

### MR. FLEMING.

The business of my office has been energetically carried on by Mr. Fleming.

### ACCESSIONS.

Thirteen thousand eight hundred and twenty-nine specimens were acquired by the Trustees during the year, and the

### LIBRARY.

Two hundred and twenty-two volumes were presented to the library during the year, and five hundred and fifty-seven were purchased.

### DONORS.

A list of the names of the donors to the Museum will be found in Appendix A, and of those to the library in Appendix B.

### THE PUBLIC.

The Trustees resolved, on the 11th September 1882, to admit visitors to the Museum on Thursdays and Fridays only by tickets, in order to afford students, and others interested in any particular department, the opportunity to study quietly and uninterruptedly. Notwithstanding this additional closed day, the visitors have increased by 4,900, the total number for the year being 295,710.

REPORT OF THE SUPERINTENDENT,

The cabinets for the Ethnological Gallery, and for the South-East Gallery, first floor, which I reported last year as having been in the course of construction for seven months, are not yet completed: it has therefore been impossible as yet to arrange the specimens in them.

The dried and alcoholic specimens have been frequently inspected during the year, and I am glad to be able to report that all the collections are in a satisfactory condition, so far as their conservation is concerned. A great deal, however, yet remains to be done before some sections of them are made available for the instruction of the public.

J. ANDERSON,  
*Superintendent, Indian Museum.*
